Journal of Fluid Mechanics **Volume 328 10 December 1996**

Shreekumar, R. Kumar & K. S. Gandhi Breakage of a drop of inviscid fluid due to a pressure fluctuation at its surface *page* 1

E. P. L. Roberts & M. R. Mackley The development of asymmetry and period doubling for oscillatory flow in baffled channels 19

A. Engqvist Self-similar multi-layer exchange flow through a contraction 49

J. H. Lammers & A. Biesheuvel Concentration waves and the instability of bubbly flows 67

J. A. Nicolás & J. M. Vega Weakly nonlinear oscillations of nearly inviscid axisymmetric liquid bridges 95

D. G. Dritschel & M. de la Torre Juárez The instability and breakdown of tall columnar vortices in a quasi-geostrophic fluid 129

R. R. Kerswell & A. M. Soward Upper bounds for turbulent Couette flow incorporating the poloidal power constraint 161

P. Koumoutsakos & D. Shiels Simulations of the viscous flow normal to an impulsively started and uniformly accelerated flat plate 177

T. S. Krasnopolskaya & G. J. F. van Heijst Wave pattern formation in a fluid annulus with a radially vibrating inner cylinder 229

Y. Kimura & J. R. Herring Diffusion in stably stratified turbulence 253

E. Crespo del Arco, P. Maubert, A. Randraimampianina & P. Bontoux Spatio–temporal behaviour in a rotating annulus with a source–sink flow 271

A. E. Hosoi & T. F. Dupont Layer formation in monodispersive suspensions and colloids 297

L. Thais & J. Magnaudet Turbulent structure beneath surface gravity waves sheared by the wind 313

C. H. K. Williamson Three-dimensional wake transition 345

REVIEWS

Turbulence: A Tentative Dictionary, edited by P. Tabeling & O. Cardoso 408

Macrotransport Processes, by H. Brenner & D. A. Edwards 409
